AUTHOR INDEX

VOLUME 20 NUMBERS 1–8

A

Adamczewska-Goncerzewicz, Z. See *Freysz, Farooqui, Adamczewska-Goncerzewicz, and Mandel* 503

Adamo, Sergio. See *Bhat et al.* 357

Ahlberg, Jon, Bo Angelin, Ingemar Björkhem, Kurt Einarsson, and **Barbro Leijd.** Hepatic cholesterol metabolism in normo- and hyperlipidemic patients with cholesterol gallstones 107

Akalovsky, Irene. See *Bhat et al.* 357

Alaniz, María J. T. de. See *Gómez Dumm, Alaniz, and Brenner* 834

Alavi, M. See *Schneider et al.* 1048

Albers, John J. See *Cheung and Albers* 200

Albrightson, Christine. See *Yates et al.* 428

Alejandre, M. J., H. Ramirez, J. L. Segovia, M. D. Suarez, and E. Garcia-Peregrin. Developmental pattern and diurnal rhythm of neonatal chick HMG-CoA reductase (Abstract) 1044

Allen, Donald O., Kathryn J. Long, and **James T. Majors.** Characterization of the multiple-chamber perifused fat cell system 1036

Andersén, Eva, and **Kjell Hellström.** The effect of cholesterol feeding on bile acid kinetics and biliary lipids in normolipidemic and hyperlipidemic subjects 1020

Andersen, John M., and **John M. Dietschy.** Absolute rates of cholesterol synthesis on extrahepatic tissues measured with ^{3}H-labeled water and ^{14}C-labeled substrates 740

Angelin, Bo. See *Ahlberg et al.* 107

B

Baginsky, Marietta L., and **W. Virgil Brown.** A new method for the measurement of lipoprotein lipase in postheparin plasma using sodium dodecyl sulfate for the inactivation of hepatic triglyceride lipase 548

Bailey, J. Martyn. See *Wu, Butler, and Bailey* 472

Baraona, Enrique, and **Charles S. Lieber.** Effects of ethanol on lipid metabolism 289

Barnes, John S. See *Gerber, Barnes, and Nies* 912

Barnes, S., P. G. Burhol, R. Zander, G. Haggstrom, R. L. Settine, and **B. I. Hirschowitz.** Enzymatic sulfation of glycochenodeoxycholic acid by tissue fractions from adult hamsters. 952

Barque, J. P., and **D. G. Dervichian.** Enzyme–substrate interaction in lipid monolayers. II. Binding and activity of lipase in relation to enzyme and substrate concentration and to other factors 447

——— and ———. Enzyme–substrate interaction in lipid monolayers. III. A study of the variation of the surface concentration with lipolysis 599

———. See *Dervichian and Barque* 437

Batta, A. K., Gerald Salen, J. F. Blount, and **S. Shefer.** Configuration at C-25 in 3α,7α,12α-trihydroxy-5β-cholestan-26-oic acid by X-ray crystallography 935

———. See *Kihira et al.* 421

Baumann, Wolfgang J. See *Smaby, Baumann, and Brockman* 789

Beg, Zafarul H., John A. Stonik, and **H. Bryan Brewer, Jr.** In vitro and in vivo regulation of HMGR and reductase kinase (RK) activities by reversible phosphorylation (Phos)–dephosphorylation (Dephos) (Abstract) 1044

Belfrage, Per. See *Nilsson and Belfrage* 557

Bell, Robert M. See *Polokoff, Coleman, and Bell* 17

Bennett, Peter H. See *Garnick, Bennett, and Langer* 31

Bennett Clark, Susanne. See *Holt, Wu, and Bennett Clark* 494

Bentzen, Craig L., and Klaus Brendel. Synthesis of [24,25-^{3}H]cholesterol: a new substrate for determining the rate of cholesterol side chain oxidation 134

Berndt, J., R. Henneberg, and M. Löwel. Interconvertible forms of HMGR in vitro and the in vivo activity of the enzyme (Abstract) 1045

Bernstein, Robert S. Insulin insensitivity and altered glucose utilization in cultured rat adipose tissue 848

Bhat, Pangala V., Luigi M. De Luca, Sergio Adamo, Irene Akalovsky, Carol S. Silverman-Jones, and **Gary L. Peck.** Retinoid metabolism in spontaneously transformed mouse fibroblasts (Balb/b 3T12-3 cells): enzymatic conversion of retinol to anhydroretinol 357

Bhattacharayya, Ashim K. See *Carter et al.* 66

Bicker, Susan. See *Shepherd et al.* 999

Billheimer, J. T. See *Gaylor et al.* 1045

Björkhem, Ingemar. See *Ahlberg et al.* 107

Björntorp, Per, Majvor Karlsson, Lars Gustafsson, Ulf Smith, Lars Sjöström, Massino Cigolini, Gunnar Storck, and **Per Pettersson.** Quantitation of different cells in the epididymal fat pad of the rat 97

Black, Paul H. See *Ruggieri, Roblin, and Black* 772

Blount, J. F. See *Batta et al.* 935

Boehm, Geoffrey. See *Popják et al.* 716

Boesel, Carl P. See *Yates et al.* 428

Borgström, Bengt, Charlotte Erlanson-Albertsson, and **Tadeusz Wieloch.** Pancreatic colipase: chemistry and physiology 805

Bouhours, Jean-François, and **Henri Guignard.** Free ceramide, sphingomyelin, and glucosylceramide of isolated rat intestinal cells 897

Boulangé, A., E. Planche, and **P. de Gasquet.** Onset of genetic obesity in the absence of hyperphagia during the first week of life in the Zucker rat (*falfa*) 857

Brecher, Peter, and Hui-Tseng Kuan. Lipoprotein lipase and acid lipase activity in rabbit brain microvessels 464

Bremer, Eric G., Sonja K. Gross, and **Robert H. McCluer.** Quantitative analysis of monosialogangliosides by high-performance liquid chromatography of their perbenzoyl derivatives 1028

Brendel, Klaus. See *Bentzen and Brendel* 134

Brenner, Rodolfo R. See *Gómez Dumm, Alaniz, and Brenner* 834

Brent, Lynn G. See *Smith, Brent, and Thompson* 1049

Fidge, Noel. See *Ishikawa and Fidge* 254
Fisher, Waldo R. See *Shireman and Fisher* 594
Fogelman, Alan M., Janet Seager, Martha Hokom, and **Peter A. Edwards.** Separation of and cholesterol synthesis by human lymphocytes and monocytes 379
———. See *Edwards, Lemongello, and Fogelman* 2, 40
———. See *Popják et al.* 716
Freychet, P. See *Lavau et al.* 8
Freysz, L., A. A. Farooqui, Z. Adamczewska-Goncerzewicz, and **P. Mandel.** Lysosomal hydrolases in neuronal, astroglial, and oligodendroglial enriched fractions of rabbit and beef brain 503
Fried, S. K. See *Lavau et al.* 8

G

Gambert, S. See *Tulp, Gambert, and Horton* 47
Garcia-Peregrin, E. See *Alejandre et al.* 1044
Garnick, Marc B., Peter H. Bennett, and **Terry Langer.** Low density lipoprotein metabolism and lipoprotein cholesterol content in southwestern American Indians 31

Gaylor, J. L., J. T. Billheimer, M. A. Longino, and **J. M. Trzaskos.** Synchronous regulation of microsomal enzymes of cholesterol biosynthesis (Abstract) 1045
Geelen, Math J. H. See *Ingebritsen et al.* 1046
George, Rajan. See *Ramasarma, George, and Menon* 1048
Gerber, John G., John S. Barnes, and **Alan S. Nies.** Measurement of arachidonic acid in the plasma by gas–liquid chromatography–flame ionization using dihomo-γ-linolenic acid as an internal standard 912
Getz, Godfrey S. See *Hay and Getz* 334
Gibson, David M. See *Ingebritsen et al.* 1046
Gidez, Lewis I. See *Segal et al.* 784
Gil, Gregorio, Mercedes Sitges, and **Fausto G. Hegardt.** Purification and properties of different HMG-CoA reductase phosphatases from rat liver (Abstract) 1045
———. See *Sitges, Gil, and Hegardt* 1049
Gómez Dumm, Irma N. T. de, María J. T. de Alaniz, and **Rodolfo R. Brenner.** Effect of glucocorticoids on the oxidative desaturation of fatty acids by rat liver microsomes 834
Goodman, DeWitt S. See *Harrison, Smith, and Goodman* 760
———. See *Kanda and Goodman* 865
Grace, D. M. See *Wolfe and Grace* 175
Gravel, Ying Lin. See *Novak et al.* 678
Greene, Dianne G. See *Rudel, Shah, and Greene* 55
Gross, Sonja K. See *Bremer, Gross, and McCluer* 1028
Grundy, Scott M. See *Mok, von Bergmann, and Grundy* 389
Guignard, Henri. See *Bouhours and Guignard* 897
Gustafsson, Jan. Metabolism of 3α,7α-dihydroxy-5β-cholestanoic acid by rat liver in vivo and in vitro 265
Gustafsson, Lars. See *Björntorp et al.* 97

H

Haggstrom, G. See *Barnes et al.* 952
Hakomori, S. See *Young, Laine, and Hakomori* 275
Hancock, Anthony J., and **Mark D. Lister.** Synthesis of all-*cis*-1,3-diacylcyclopentane-1,2,3-triol-2-phosphate via acyl group migration in a cyclic diglyceride analog 271
Hanson, Russel F., Alan B. Staples, and **Gale C. Williams.** Metabolism of 5β-cholestane-3α,7α,12α,26-tetrol and 5β-cholestane-3α,7α,12α,25-tetrol into cholic acid in normal human subjects 489
Hansson, Gunnar C., Edith Heilbronn, Karl-Anders Karlsson, and **Bo E. Samuelsson.** The lipid composition of the electric organ from the ray, *Torpedo marmorata,* with special reference to sulfatides and Na^+-K^+-ATPase 509
Harrison, Earl H., John Edgar Smith, and **DeWitt S. Goodman.** Unusual properties of retinyl palmitate hydrolase activity in rat liver 760
Hart, Ronald W. See *Yates et al.* 428
Hassan, Aslam S., and **Alfred J. Rampone.** Intestinal absorption and lymphatic transport of cholesterol and β-sitostanol in the rat 646
Hatam, Lynda J., and **Herbert J. Kayden.** A high-performance liquid chromatographic method for the determination of tocopherol in plasma and cellular elements of the blood 639
Hauser, S. See *Salen et al.* 22
Havel, Richard J. See *Sigurdsson, Noel, and Havel* 316
Hay, Rick, and **Godfrey S. Getz.** Translation in vivo and in vitro of proteins resembling apoproteins of rat plasma very low density lipoprotein 334
Hayssen, Virginia. See *Jungalwala et al.* 579
Hegardt, Fausto G. See *Gil, Sitges, and Hegardt* 1045
———. See *Sitges, Gil, and Hegardt* 1049
Heilbronn, Edith. See *Hansson et al.* 509
Hellström, Kjell. See *Andersén and Hellström* 1020
Henneberg, R. See *Berndt, Henneberg, and Löwel* 1045
Henriquez, Diane S., Helen M. Tepperman, and **Jay Tepperman.** Effects of high-glucose and high-fat diets on concanavalin A binding to rat liver plasma membranes and on the amount and pattern of their glycoprotein carbohydrates 624
Hirsch, Jules. See *Klyde and Hirsch* 691, 705
Hirschowitz, B. I. See *Barnes et al.* 952
Hodges, V. A. See *Chanderbhan et al.* 116
———. See *Vahouny, Hodges, and Treadwell* 154
Hofmann, Alan F. See *Raedsch, Hofmann, and Tserng* 796
———. See *Tangedahl, Hofmann, and Kottke* 125
Hokom, Martha. See *Fogelman et al.* 379
Hollander, Daniel. See *Chow and Hollander* 349
Holt, Peter R., Ai-Lien Wu, and **Susanne Bennett Clark.** Apoprotein composition and turnover in rat intestinal lymph during steady-state triglyceride absorption 494
Horiuti, Yoshifumi. See *Imamura and Horiuti* 519
Horton, E. S. See *Tulp, Gambert, and Horton* 47
Hostetler, Karl Y., and **Paul J. Yazaki.** The subcellular localization of neutral sphingomyelinase in rat liver 456
———, **Bruce D. Zenner,** and **Harold P. Morris.** Phosphatidylserine biosynthesis in mitochondria from the Morris 7777 hepatoma 607
Hunter, Carolyn F., and **Victor W. Rodwell.** Regulation of vertebrate HMG-CoA reductase activity in vitro via reversible modulation of its catalytic activity (Abstract) 1046
Huterer, Srebrenka, and **John Wherret.** Metabolism of bis(monoacylglycero)phosphate in macrophages 966
Hylemon, P. B. See *Stellwag and Hylemon* 325

I

Iida, Takashi, Mitsuko Kikuchi, Toshitake Tamura, and **Taro Matsumoto.** Proton magnetic resonance identification and discrimination of stereoisomers of C_{27} steroids using lanthanide shift reagents 279
Imamura, Shigeyuki, and **Yoshifumi Horiuti.** Purification of phospholipase C from *Bacillus cereus* by hydrophobic chromatography on palmitoyl cellulose 519
Ingebritsen, Thomas S., Math J. H. Geelen, Rex A. Parker, and **David M. Gibson.** Short-term modulation of HMG-CoA reductase by reversible phosphorylation (Abstract) 1046
Ishikawa, Eiji. See *Maeda et al.* 960
Ishikawa, Toshitsugu, and **Noel Fidge.** Changes in the concentration of plasma lipoproteins and apoproteins following administration of Triton WR 1339 to rats 254
Iwamori, Masao, Cathrine Costello, and **Hugo W. Moser.** Analysis and quantitation of free ceramide containing nonhydroxy and 2-hydroxy fatty acids, and phytosphingosine by high-performance liquid chromatography 86

SUBJECT INDEX

VOLUME 20 NUMBERS 1–8

A

Absorption
Of fat, steady-state rat intestinal lymph apoprotein composition and turnover during 494
Intestinal, of cholesterol and β-sitostanol in the rat 646
Of linoleic acid by rat jejunum in vitro 349
Acetyl CoA: Cytoplasmic, utilization in fatty acid synthesis 974
Acid lipase: Activity, in rabbit brain microvessels 464
Acyl CoA reductase: Specificity and synthesis of wax esters in mouse preputial gland tumors 890
Adipocyte(s)
Inhibition of epinephrine-induced lipolysis in rabbits 208
Insulin resistance in, mechanism of 8
Monitoring of FFA release from by pH-stat titration 557
Number and size, effect of protein malnourishment 47
Perifusion of in a multiple chamber system 1036
Rat, mature, association with proliferating cells 691
Adipose tissue
Cultured, insulin insensitivity and altered glucose utilization 848
Development, in protein-malnourished rats 47
Increased cellular proliferation in adult rats fed a high-fat diet 705
Rat, labeling of DNA in, with [^{3}H]thymidine 691, 705
Swine, ontogeny of glycerolipid biosynthetic enzymes 246
Adrenals: Rat, 18-hydroxylation of endogenous and exogenous corticosterone in 729
Adrenocortical cells
In vitro function, in essential fatty acid deficiency 154
Rat, prostaglandin synthesis in 116
Alcohols, long chain: Synthesis in preputial gland tumor by NADPH: acyl CoA oxidoreductase 890
Alkaline phosphatase: Activity, distribution in isolated ileal epithelial cells 879
Aminopropyl silica gel: Use of in purification of glycolipid antibodies 825
4-Aminopyrazolol[3,4-*d*]pyrimidine: Effect of on distribution of HMG-CoA reductase in isolated ileal epithelial cells 879
Anhydroretinal: Enzymatic formation of from retinol by transformed mouse fibroblasts 357
Apolipoprotein(s)
A-I, A-II, C-II, and C-III in urine of normal subjects 784
A-I and A-II, distribution in HDL subfractions 200
A-I and A-II, in structure of HDL_3 143
A-I, A-IV, ARP, and C, incorporation of [^{3}H]leucine into during triglyceride absorption 494
B, regulation of its binding to cellular receptors 594
B, role of in control of cholesterol biosynthesis by fibroblasts 594
C, fate of during lipolysis of VLDL in vitro 614
Of HDL, catabolic rate 316
LDL, soluble, preparation and properties of 631
Role in structural organization of plasma lipoproteins 143
Translation of proteins resembling apoB and apoARP of rat plasma VLDL 334
Apoprotein(s)
Composition and turnover in rat intestinal lymph during steady-state triglyceride absorption 494
Of HDL in urine from normal subjects 784
Of hyperlipoproteinemic rhesus monkeys 55
APP: *see* **4-Aminopyrazolol [3,4-*d*]pyrimidine**
Arachidonic acid
Plasma, measurement by GLC, using dihomo-γ-linolenic acid as internal standard 912
Synthesis of prostaglandin from, in rat adrenocortical cells 116
Arginine-rich protein: Translation of protein resembling, in vivo and in vitro 334
ARP: *see* **Arginine-rich protein**
ATPase, Na^+-K^+: Activity, of the electric organ of the ray, *Torpedo marmorata* 509

B

***Bacillus cereus*:** Phospholipase C, purification by hydrophobic chromatography on palmitoyl cellulose 519
Balb/C 3T3 cells: Untransformed, SV40-transformed, and concanavalin A-selected SV3T3 revertant, and plasma membranes, lipids of 772
Balb/C 3T12-3 cells: Retinoid metabolism in 357
Beer: Content of mevalonate in 716
Bile
Cholesterol in, regulation of output in the rat 923
Lipids, output and composition in the rat 923
Bile acid(s)
Absorption in man 389
Conjugated and free, GLC assay of heptafluorobutyrate derivatives of 78
Formation of from 3α,7α-dihydroxy-5β-cholestanoic acid 265
Kinetics, effect of cholesterol feeding on 1020
Kinetics in hypercholesterolemia 125
Metabolism of precursors of in cerebrotendinous xanthomatosis 22
Bile salts: Interaction with lipase, colipase and substrate 805
Biliary lipid(s)
Effect of cholesterol feeding on 1020
Secretion in hypercholesterolemia 125
Biliary obstruction: Disappearance of ursodeoxycholic acid in rabbits with 960
Bis(monoacylglycero) phosphate
Metabolism of, in macrophages 966
Synthesized in rat liver lysosomes, stereoconfiguration of 840

Blood cells: Human, uptake of mevalonate and mevalonolactone by 716
Brain: Bovine, fatty acid and sphingoid composition of sphingomyelin of 579

C

Carbohydrate: In rat liver plasma membrane, effect of diet on 624
Cellular localization of enzymes
Cholic acid CoA ligase in rat liver 17
Sphingomyelinases in rat liver 456
Ceramide(s)
Free, analysis and quantitation of by HPLC 86
Free, analysis of in rat tissues 86
Free, in rat intestine epithelial cells, long chain base composition of 897
Cerebrotendinous xanthomatosis: Metabolism of precursors of chenodeoxycholic acid in 22
Chenodeoxycholic acid
7α-Dehydroxylation of, by *Clostridium leptum* 325
Metabolism of precursors of, in cerebrotendinous xanthomatosis 22
5β-Cholestane tetrols: Conversion to cholic acid in normal human subjects 489
Cholestenols: 14α-Hydroxmethyl, chemical synthesis of 570
Cholesterol
Absolute rate of synthesis in extrahepatic tissues 740
Absorption in man 389
Biliary, regulation of output in the rat 923
Biosynthesis by fibroblasts, control of by apoB 594
Dietary, induction of dyslipoproteinemia in rhesus monkeys by 55
Distribution in HDL subfractions 200
Efflux, in rat hepatocytes, effect of glucagon, norepinephrine, and dibutyryl cyclic AMP 2
Feeding, effect of on bile acid kinetics, steroid balance, and biliary lipids 1020
Hepatic, metabolism of in patients with gallstones 107
Hepatic synthesis of in the rat 923
Hydrated, phase behavior of 525
Intestinal absorption and lymphatic transport, in the rat 646
Intestinal lymph, origin in filarial chyluria 941
[24,25-^{3}H]-Labeled, substrate for determining rate of cholesterol side chain oxidation 134
[24,25-^{3}H]-Labeled, synthesis of 134
In lipoproteins, in southwestern American Indians 31
Mechanism of uptake, by cultured fibroblasts 472
Metabolism, in familial hypercholesterolemia (type IIa) 66
Metabolism in rats, effect of diosgenins 162
And phosphatidylcholine mixed vesicles, interaction with HDL 817
C_{27} Sterol precursors of, HPLC of 681
Synthesis by human lymphocytes and monocytes 379
In VLDL, fate of during lipolysis 614
Cholesteryl decanoate: Crystal structure of 753
Cholesteryl ester(s)
Behavior of in monolayer and bulk phases 789
HDL, role of in regulation of LCAT after a high-fat test meal 399
Hydrolysis of μ in rat adrenocortical cells 154
Interaction with phospholipids 183
Molecular packing in monolayers 753
Transport in the rat 316
Cholesteryl myristate: Interaction with dimyristoyl lecithin 183
Cholestyramine
Effect on cholesterol metabolism in rats 162
Effect of on distribution of HMG-CoA reductase in isolated ileal epithelial cells 879
Effect of on intestinal absorption of cholesterol and β-sitostanol in the rat 646
Cholic acid
7α-Dehydroxylation of, by *Clostridium leptum* 325
Formation from 5β-cholestane tetrols in normal human subjects 489
Synthesis and secretion by isolated rat hepatocytes, measurement of 914
Cholic acid CoA ligase: Location of on cytoplasmic surface of hepatic microsomal vesicles 17
Chromatography, affinity
Of anti-glycolipid antibodies 825
Enrichment of anti apoVLDL and anti ARP 334
Chromatography, agarose gel: Of human VLDL 481
Chromatography, column: Of rhesus monkey lipoproteins on agarose 55
Chromatography, gas–liquid
Of aldehydes derived from long chain bases of ceramides from rat intestinal cells 897
Of heptafluorobutyrate derivatives of conjugated and free bile acids, quantitative assay 78
Measurement of arachidonic acid in plasma by 912
Of retinol and anhydroretinol 357
Chromatography, high performance liquid
Of free ceramide containing phytosphingosine 86
Of perbenzoyl derivatives of monosialogangliosides 1028
Reversed-phase, of molecular species of sphingomyelin 579
Of C_{27} sterol precursors of cholesterol 681
Of tocopherol in plasma and cellular elements of blood 639
Chromatography, hydrophobic: Of phospholipase C on palmitoyl cellulose 519
Chromatography, thin-layer
Of ceramides from rat intestinal cells 897
Of diastereoisomers of 3α, 7α, 12α-trihydroxy-5β-cholestan-26-oic acid 935
Of gangliosides 428
Reversed-phase partition of calcium complexes of sulfated bile acid conjugates 796
Chylomicron(s): Rat intestinal lymph, turnover during triglyceride absorption 494
Chylomicron remnants: Formation after a fatty meal in normo- and hypertriglyceridemic man 217
Chyluria: Filarial, origin of intestinal lymph cholesterol in 941
Circular dichroism: Of human serum VLDL and IDL 481
***Clostridium leptum*:** 7α-Dehydroxylation of bile acids by 325
Colipase: Pancreatic, chemistry and physiology 805
Con A: *see* ***Concanavalin A***
Concanavalin A: Binding to rat liver plasma membranes, effect of diet 624
Corticosterone: 18-Hydroxylation of, in rat adrenals 729

Crypt cells: Rat ileum, distribution of HMG-CoA reductase in 879
Crystal structure: Of cholesteryl decanoate 753
Cultured cells: Inhibition of sterol biosynthesis in 994
Cyclic AMP: Inhibition of fatty acid synthesis by 974
Cyclohexanedione: Use of in studies of receptor-mediated catabolism of LDL in man 999
Cytochrome P-450 system: Rat adrenal, 18-hydroxylation of corticosterone by 729

D

7α-Dehydroxylation: Of cholic and chemodeoxycholic acid by *Clostridium leptum* 325
Delipidated sera: Comparison of in studies of sterol synthesis by human mononuclear leukocytes 413
Deoxyribonucleic acid
Content in adipose tissue of adult rats fed a high-fat diet 705
In rat adipose tissue, labeling of with [^{3}H]thymidine 691, 705
Diabetes: Streptozotocin, utilization and mobilization of lipid in skeletal muscle of rats with 654
Dibutyryl cyclic AMP
Effect of on HMG CoA reductase activity and cholesterol efflux, in rat hepatocytes 2
Effect of on phosphofructokinase and carbohydrate metabolism in avian hepatocytes 974
Inhibition of fatty acid synthesis by 974
Diet
High-fat, effect of on insulin binding by rat adipocytes 8
High-fat, increased cellular proliferation of adipose tissue in adult rats 705
High-glucose and high-fat, effect of on Con A binding to rat liver plasma membranes 624
High sucrose-lard, production of hypertriglyceridemia by, in young nonobese rats 371
Differential scanning calorimetry
Of anhydrous cholesterol and cholesterol monohydrate 525
Of mixtures of dimyristoyl lecithin and cholesteryl myristate 183
Differentiation: Of rat adipose tissue 705
Digitonin: Use of in radioassay of plasma LCAT 1040
Dihomo-γ-linolenic acid: As an internal standard in measurement of plasma arachidonic acid 912
3α,7α-Dihydroxy-5β-cholestanoic acid
Metabolism of by rat liver in vivo and in vitro 265
Reverse cross-coupling in synthesis of 421
Diosgenin
Effect of on HMG CoA reductase in rat liver 162
Effect of on lipid metabolism in rats 162
***syn-syn*-1,3-Dipalmitoyl-2-O-phosphoryl-1,2,3-triol:** Synthesis of 271
DNA: *see* **Deoxyribonucleic acid**

E

Electroimmunoassay: Of rat plasma apoproteins 254
Electron microscopy
Of HDL 817
Of muscle cells of normal and diabetic rats 654
Electrophoresis
Gradient gel, of HDL subfractions 200
Gradient gel, of rat VLDL and HDL apoproteins 254
SDS polyacrylamide gel, gradient of apo LDL 631
SDS-polyacrylamide gel of hyperlipoproteinemic rhesus monkey apoproteins 55
Enterohepatic circulation: Of cholesterol and bile acids in man 389
Enzyme-immunoassay: Solid phase, of ursodeoxycholic acid 960
Enzyme phosphorylation and dephosphorylation: (Abstracts) 1044
Enzyme-substrate interactions: In lipid monolayers 437, 447, 599
Epididymal fat pad: Rat, quantitation of different cells 97
Epinephrine: Responsiveness of rabbit adipocytes to 208
Epithelial cells
Rat ileum, distribution of HMG-CoA reductase in 879
Rat small intestine, free ceramide, sphingomyelin, and glucosylceramide in 897
Erythrocyte(s)
Human, α-tocopherol content of 639
Membranes, bovine, isolation and characterization of a heptaglycosylceramide 669
Sheep and pig, analysis of sphingomyelins of, by HPLC 579
Sheep and pig, fatty acid and sphingoid composition of sphingomyelin of 579
Essential fatty acid deficiency: Effect of on adrenal cortical function in vitro 154
Ethanol
Effects on lipid metabolism 289
Role in development of atherosclerosis 289
Extrahepatic tissues: Absolute rate of cholesterol synthesis in 740

F

Familial hypercholesterolemia: Receptor-mediated catabolism of LDL in 999
Fasting: Effect of on distribution of HMG-CoA reductase in isolated ileal epithelial cells 879
Fat cells: Perifusion of in a multiple chamber system 1036
Fatty acid(s)
Composition of lipids of cultured human fibroblasts, modification of 536
Of glycerophospholipids, *Tetrahymena pyriformis*, positional distribution of 363
Oxidative desaturation of by rat liver microsomes, effect of glucocorticoids on 834
Synthesis in avian liver, control of 974
Triglyceride, metabolism in swine 175
Fatty liver: Ethanol-induced 289
Fatty meal: Effect of on content, composition, and size of VLDL and LDL in normo- and hypertriglyceridemic man 217
FFA: *see* **Free fatty acids**
Fibroblasts
Control of cholesterol biosynthesis by, by apo B 594
Cultured human, modification of fatty acid composition of lipids of 536
Cultured human, uptake of LDL and HDL 472

Transformed mouse, enzymatic conversion of retinol to anhydroretinol by 357
Fractional catabolic rate: Of rat HDL 316
Free fatty acid(s)
Metabolism in swine 175
Release from adipocytes, monitoring of by pH-stat titration 557
Release from skeletal muscle of normal and diabetic rats 654

G

Galactose oxidase: Use of in preparation of ^{3}H-labeled gangliosides GM_2 and GA_2 678
Gallstones: Normo- and hyperlipidemic patients with cholesterol metabolism 107
Gangliosides
GM_2 and GA_2, radiolabeled, preparation of 678
Small scale isolation method for 1028
Structures of 825
Of tumor tissues and cultured cells 428
Genetic obesity: In the Zucker rat (fa/fa), early prediction of phenotype 857
GLC: *see* **Chromatography, gas–liquid**
Glucagon
Effect of on HMG CoA reductase activity and cholesterol efflux, in rat hepatocytes 2
Effect of on phosphofructokinase and carbohydrate metabolism in avian hepatocytes 974
Glucocorticoids: Effect of on oxidative desaturation of fatty acids 834
Glucose utilization: In cultured rat adipose tissue 848
Glucosylceramide: Of rat intestinal cells, long chain base composition of 897
Glycerolipid: Biosynthetic enzymes in swine liver and adipose tissue, ontogeny of 246
***sn*-Glycero-3-phosphocholine:** Acylation of, in synthesis of phosphatidylcholines 674
Glycerophospholipids
Labeled, stereoconfiguration of 840
Tetrahymena pyriformis, positional distribution of fatty acids of 363
Glycochenodeoxycholic acid: Enzymatic sulfation of by tissue fractions from adult hamsters 952
Glycolipid(s)
Antibodies, purification of 825
Antigen immunoadsorbents, preparation of 825
Covalent attachment to solid supports and macromolecules 275
Poly-, synthesis of 275
Glycoprotein: Rat liver plasma membranes, effect of diet on carbohydrate composition 624
Glycosphingolipids
From bovine erythrocyte membranes 669
Neutral, structures of 825

H

HDL: *see* **High density lipoprotein**
Hepatocytes
Avian, control of fatty acid synthesis in 974
Isolated rat, measurement of synthesis and secretion of cholic acid by 914
Rats, HMG CoA reductase and cholesterol efflux, effect of hormones on 2
Hepatoma: Morris 7777, biosynthesis of phosphatidylserine in mitochondria from 607
Heptafluorobutyrate derivatives: Of bile acids, quantitative assay of, by GLC 78
Heptaglycosylceramide: From bovine erythrocyte membranes, isolation and characterization of 669
High density lipoprotein(s)
Apoproteins of in urine from normal subjects 784
Cholesteryl esters, role of in regulation of plasma LCAT activity in man 399
Hepatic catabolism of 316
Interaction with mixed vesicles of phosphatidylcholine and cholesterol 817
Structural organization 143
Subfractions, distribution of apoA-I and apoA-II 200
Uptake by normal, hypercholesterolemic, and tumor virus-transformed human fibroblasts 472
HMG CoA reductase: *see* **3-Hydroxy-3-methylglutaryl coenzyme A reductase**
HPLC: *see* **Chromatography, high performance liquid**
Hydrolases, lysosomal: In fractions of rabbit and beef brain 503
3β-Hydroxy-5-cholenoic acid: Serum, radioimmunoassay of 986
12α-Hydroxylase: Hepatic, activity of in normo- and hyperlipidemic patients with cholesterol gallstones 107
18-Hydroxylase: Heterogeneity of activity of, in rat adrenals 729
25-Hydroxylase: Hepatic, activity of in normo- and hyperlipidemic patients with cholesterol gallstones 107
18-Hydroxylation: Of corticosterone in rat adrenals 729
3-Hydroxy-3-methylglutaryl CoA reductase (Abstracts) 1044
Activity, in cultured cells, effect of 14α-alkyl substituted 15-oxygenated sterols on 994
Activity, distribution in isolated ileal epithelial cells 879
Hepatic, activity of in normo- and hyperlipidemic patients with cholesterol gallstones 107
Hepatic, solubilization and assay of 40
Improved methods for assay and activation 588
Kinase (Abstracts) 1044
Kinase kinase (Abstracts) 1044
Phosphatase (Abstracts) 1044
In rat hepatocytes, effect of glucagon, norepinephrine, and dibutyryl cyclic AMP 2
Rat liver, relation to plasma mevalonate 716
12α-Hydroxysteroid dehydrogenase: From *Clostridium* group P strain C 48-50, partial purification and characterization 234
Hypercholesterolemia
Biliary lipid secretion in 125
In cholesterol-fed rhesus monkeys 55
Familial (type IIa), cholesterol turnover, synthesis, and absorption in 66
Hyperlipemia: Alcoholic, pathogenesis 289
Hyperplasia: Of adipose tissue of adult rats fed a high-fat diet 705
Hypertriglyceridemia
Changes in VLDL and LDL after a fatty meal 217
Dietary-induced in young, nonobese rats, characterization of 371

Effect of cholesterol feeding on bile acids and biliary lipids 1020

I

Ileum: Rat, epithelial cells, distribution of HMG-CoA reductase in 879
Immunoassay
Enzyme, of ursodeoxycholic acid 960
Enzyme-linked, of ursodeoxycholic acid in serum 240
Immunoelectrophoresis
Tandem-crossed of intact LDL and soluble apoLDL 631
Of urinary apoproteins 784
Insulin
Effect of on in vitro release of FFA from skeletal muscle of normal and diabetic rats 654
Effect of metabolism in rat adipocytes 8
Insensitivity in cultured rat adipose tissue 848
Resistance in adipocytes of rats fed a high fat diet 8
Intermediate density lipoprotein: Human serum, secondary structure of 481
Intestinal absorption: Of cholesterol and bile acids in man, effects of feeding 389
Isoelectric focusing: Of intact LDL and soluble apoLDL 631
Isoproterenol: Effect of on in vitro release of FFA from skeletal muscle of normal and diabetic rats 654
Isotope dilution analysis: Of gangliosides 1028

J

Jejunum: Rat, in vitro absorption of linoleic acid 349

K

Kinetics
Bile acid, effect of cholesterol feeding on 1020
of HMG-CoA reductase 40
Of lipase action on 1,3-didecanoylglycerol in monolayers 437, 447

L

LCAT: *see* **Lecithin: cholesterol acyltransferase**
LDL: *see* **Low density lipoprotein**
Lecithin: cholesterol acyltransferase
Plasma, rapid radioassay procedure for 1040
Plasma, regulation in man 399
Plasma, response to fat ingestion, in man 399
Leukemia cells: Myeloblastic, lipids of 908
Leukocytes
Human mononuclear, sterol synthesis by 413
Human, separation of lymphocytes and monocytes 379
Linoleic acid
Absorption of by rat jejunum in vitro 349
In cultures of human fibroblasts, effect of on fatty acid composition of lipids 536
Lipase, hepatic: Triglyceride, inactivation by sodium dodecyl sulfate 548
Lipids
Of Balb/C 3T3, SV3T3, and concanavalin A-selected revertant cells and plasma membranes 772
Biliary, output in man, effect of continuous and intermittent feeding 389
Of cultured human fibroblasts 536
In normal and immature neutrophils and myeloblastic leukemia cells 908
Utilization and mobilization in skeletal muscle of normal and diabetic rats 654
Lipid composition
Of human neural tumors 428
Of the electric organ of the ray, *Torpedo marmorata* 509
Lipid metabolism: In cultured cells 472
Lipogenesis: In cultured rat adipose tissue 848
Lipogenic enzymes: Activity, effect of diet on in rat adipocytes 8
Lipolysis
In cultured rat adipose tissue 848
By fat cells, in a multiple chamber perifusion system 1036
In isolated rabbit adipocytes, inhibition of 208
Lipoprotein lipase
Action on VLDL, in vitro 614
Activity, in rabbit brain microvessels 464
Adipose tissue, in hypertriglyceridemic rats 371
Measurement of in postheparin plasma 548
Lipoproteins, plasma
Changes in, following administration of Triton WR 1339 to rats 254
Cholesterol content of, in southwestern American Indians 31
Of hyperlipoproteinemic rhesus monkeys 55
Structural organization role of apolipoproteins 143
Liver: Swine, ontogeny of glycerolipid biosynthetic enzymes 246
Liver disease: Radioimmunoassay of serum 3β-hydroxy-5-cholenoic acid in 986
Long chain bases: Of ceramides from rat intestinal cells 897
Low density lipoprotein(s)
Binding of, by fibroblasts 594
Changes, after a fatty meal in normo- and hypertriglyceridemic man 217
Delipidated, soluble and immunoreactive, preparation and properties of 631
Metabolism in southwestern American Indians 31
Receptor-mediated catabolism in man 999
Turnover of, in familial hypercholesterolemia (type IIa) 66
Uptake by normal, hypercholesterolemic, and tumor virus-transformed human fibroblasts 472
Lymphatic transport: Of cholesterol and β-sitostanol in the rat 646
Lymphocytes: Human, cholesterol synthesis by 379
Lysobisphosphatic acid: Lysosomal, comparison of stereochemical configuration with phosphatidylcholine and phosphatidylethanolamine 230
Lysosomes
Of neuronal, astroglial, and olidodendroglial enriched fractions of rabbit and beef brain, hydrolases in 503
Rat liver, synthesis of bis(monoacylglycero) phosphate in vitro 840
Stereochemical configuration of phospholipids in 230

M

***Macaca mulatta*:** Induction of atherogenic dyslipoproteinemia by dietary cholesterol 55

Macrophages: Metabolism of bis(monoacylglycero) phosphate in 966
Mass fragmentography
Of *O*-methyloxime-trimethylsilyl ether derivatives of steroids 729
Use of in assay of 18-hydroxylation of corticosterone in rat adrenals 729
Mass spectrometry
Of ceramides from rat intestinal cells 897
Of glucosylceramide from rat intestinal cells 897
Of heptafluorobutyrate derivatives of bile acids 78
Of (24*R* and 24*S*)-27-nor-24-methyl-3α,7α-dihydroxy-5β-cholestan-26-oic acids and cholestane triols 421
Of trimethylsilyl derivatives of electric organ lipids 509
Membrane lipids: (Abstracts) 1044
14α-Methyl-5α-cholest-7-en-3β-ol: Metabolism of 1007
Mevalonate
Determination in human and rat plasma 716
Kinase, use of in determination of mevalonate 716
And mevalonolactone, uptake by human blood cells 716
"Tolerance" test in man 716
Microsomes
Hepatic, location of cholic acid CoA ligase 17
Rat liver, oxidative desaturation of fatty acids by, effect of glucocorticoids 834
Rat liver, solubilization of HMG CoA reductase in 40
Microvessels, rabbit brain: Lipoprotein lipase and acid lipase activities in 464
Mitochondria: Rat adrenal, 18-hydroxylation of corticosterone by 729
Monocytes: Human, cholesterol synthesis by 379
Monolayers, lipid: Enzyme-substrate interaction 437, 447, 559
Monosialogangliosides: HPLC of perbenzoyl derivatives of 1028

N

Neutrophils: Immature and normal, lipids of 908
NMR: *see* **Nuclear magnetic resonance**
Norepinephrine: Effect of on HMG CoA reductase activity and cholesterol efflux, in rat hepatocytes 2
Norethindrone acetate: Inhibition of splanchnic triglyceride secretion in glucose-fed swine 175
Nuclear magnetic resonance: ^{31}P, analysis of phospholipids 408

O

Obesity: Onset during first week of life of Zucker rat (*fa/fa*) 857
Oleic acid: In cultures of human fibroblasts, effect of on fatty acid composition of lipids 536
Oxidative desaturation: Of fatty acids by rat liver microsomes, effect of glucocorticoids on 834

P

Palmitoyl cellulose: Hydrophobic chromatography of phospholipase C on 519
Pancreatic colipase: Chemistry and physiology 805
Pancreatic lipase
Action on 1,3,-didecanoylglycerol in lipid monolayers 437, 447, 599
Action on substrate in lipid monolayers, fundamental kinetics 437
Binding and activity in monolayers, in relation to enzyme and substrate concentration 447
Interaction with substrate and colipase 805
Variation of surface concentration of with lipolysis, in lipid monolayers 599
Perifusion: Multiple chamber system, for study of fat cells 1036
Phase diagram(s): Of cholesteryl myristate-dimyristoyl lecithin-water 183
Phosphatidic acid(s)
Analogs, synthesis of 271
In monolayers, effects of ionization and counterion binding on surface areas 663
Phosphatidylcholine(s)
Chemical synthesis of by acylation of *sn*-glycero-3-phosphocholine 674
And cholesterol mixed vesicles, interaction with HDL 817
Lysosomal, stereochemical configuration of, comparison with lysobisphosphatidic acid 230
Phosphatidylethanolamine
Biosynthesis in mitochondria from the Morris 7777 hepatoma 607
Lysosomal, stereochemical configuration of, comparison with lysobisphosphatidic acid 230
Phosphatidylserine: Biosynthesis in mitochondria from the Morris 7777 hepatoma 607
Phosphatidylserine decarboxylase: In Morris 7777 hepatoma 607
Phospholipase C: Of *Bacillus cereus*, purification by hydrophobic chromatography 519
Phospholipids
In Balb/C 3T3, SV3T3, and SV3T3 Rev cells and plasma membranes 772
Detection of on silical gel and reversed-phase thin-layer plates 561
Identification and quantitative analysis of, by ^{31}PNMR 408
Interaction with cholesteryl esters 183
In normal and immature neutrophils and myeloblastic leukemia cells 908
Quantitation on reversed-phase thin-layer plates by densitometry 561
Rabbit pulmonary macrophages, composition of 966
Sarcoplasmic reticulum, ^{31}PNMR spectra of 408
Synthesis of by macrophages 966
In VLDL, fate of during lipolysis 614
Phytosphingosine: Analysis of ceramide containing, by HPLC 86
Plasma membranes
Rat liver, carbohydrate composition, effect of diet on 624
Rat liver, effect of diet on Con A binding to 624
Of 3T3, SV3T3, and SV3T3 Rev cells, lipid composition of 772
Polyribosomes: Binding of anti rat apoVLDL and anti rat ARP 334
Postheparin plasma: Measurement of lipoprotein lipase 548
Preadipocytes: In rat epididymal fat pad 97
Preputial gland tumor: (ESR-586)mouse, synthesis of wax esters 890

Prostaglandin: Synthesis, in rat adrenocortical cells 116
Protein malnutrition: Effect on on adipose tissue development in rats 47
Proton magnetic resonance: Identification of C_{27} steroids using lanthanide shift reagents 279

R

Radial immunodiffusion: Determination of apo A-I and A-II 200
Radioimmunoassay
Of 3β-hydroxy-5-cholenoic acid in serum 986
Of prostaglandins in rat adrenocortical cells 116
Receptor-mediated catabolism: Of LDL in man 999
Retinoid: Metabolism in transformed mouse fibroblasts (Balb/C 3T 12-3 cells) 357
Retinol: Enzymatic conversion to anhydroretinal in transformed mouse fibroblasts 357
Retinol-binding protein: Human plasma, partial amino acid sequence of 865
Retinyl palmitate: Hydrolysis in rat liver 760
Retinyl palmitate hydrolase: Activity in rat liver, unusual properties of 760
Rhesus monkey: *see* ***Macaca mulatta***

S

Secondary structure(s): Of human serum VLDL and IDL 481
β-Sitostanol
Intestinal absorption and lymphatic transport, in the rat 646
As a marker for studying cholesterol absorption 646
Skeletal muscle: Rats, streptozotocin-diabetic, utilization and mobilization of lipid in 654
Sodium dodecyl sulfate: Inhibition of hepatic triglyceride lipase in measurement of lipoprotein lipase in post-heparin plasma 548
Sphingomyelin
Of rat intestinal cells, long chain base composition of 897
Separation of molecular species, by reversed-phase HPLC 579
Sphingomyelinase
Lysosomal, in rat liver 456
Neutral, subcellular localization in rat liver 456
Steroid balance: Effect of cholesterol feeding on 1020
C_{27}-Steroids: Stereoisomers, identification and discrimination of, by proton magnetic resonance 279
Sterol(s)
14α-Alkyl, 15-oxygenated, inhibition of sterol biosynthesis by 994
Balance, in chyluria 941
Biosynthesis, inhibition in animal cells by 14α-alkyl substituted 15-oxygenated sterols 994
14α-Hydroxymethyl, chemical synthesis of 570
Synthesis in extrahepatic tissues, absolute rate of 740
Synthesis by human mononuclear leukocytes 413
Synthesis, metabolism of 14α-methyl-5α-cholest-7-en-3β-ol 1007
Streptozotocin: Diabetes, utilization and mobilization of lipid in skeletal muscle of rats with 654
Subcellular localization: Of retinyl palmitate hydrolase activity in rat liver 760
Sulfated bile acids: Conjugates, separation as calcium complexes using reversed-phase partition TLC 796
Sulfatides: In the electric organ of *Torpedo marmorata* 509
Sulfation: Enzymatic of glycochenodeoxycholic acid 952
Sulfotransferase: Bile acid, activity in the hamster 952
Surface properties
Of cholesteryl esters in monolayers in presence of non-cholesterol lipids 789
Of lipid monolayers during lipolysis 437, 447, 599
Of monolayers of phosphatidic acids, effects of ionization and counterion binding 663
Surfactants: Effect of on in vitro absorption of linoleic acid by rat jejunal sacs 349
Synthesis: Of cholesterol in extrahepatic tissues, absolute rate of 740

T

Tetrahymena pyriformis: Positional distribution of fatty acids of glycerophospholipids of 363
Thermotropic phase behavior: Of two crystalline forms of cholesterol 525
Tissue culture: Of epididymal fat pad cells 97
Tocopherol(s): In plasma and cellular elements of blood, determination of by HPLC 639
***Torpedo marmorata*:** Electric organ, lipid composition of 509
Translation: Of proteins resembling apoproteins of rat plasma VLDL 334
Triglyceride: Splanchnic secretion in glucose-fed swine, inhibition by norethindrone acetate 175
3α,7α,12α-Trihydroxy-5β-cholestan-26-oic acid
Absolute configuration at C-25 935
Separation of diastereoisomers of, by TLC 935
Triton WR 1339: Effect of administration of on concentration of plasma lipoproteins in the rat 254
Tumors, human neural: Lipid composition of 428
Turnover
Of bile acids, in cerebrotendinous xanthomatosis 22
Of cholesterol, in familial hypercholesterolemia (type IIa) 66
Of DNA in rat adipocytes and stroma 691
of LDL, in Caucasians and American Indians 31
Of rat intestinal lymph apoproteins during triglyceride absorption 494
Of water, in the genetically obese Zucker rat (*fa/fa*) 857

U

Ultracentrifugation: CsCl equilibrium density, of HDL subfractions 200
Unstirred water layer: Effect of on in vitro absorption of linoleic acid by rat jejunal sacs 349
Urine
Excretion of lipid in, in filarial chyluria 941
From normal humans, apoproteins of HDL in 784
Ursodeoxycholic acid
Disappearance from plasma after injection into rabbits 960
In serum, enzyme-linked immunoassay of 240
Solid phase enzyme-immunoassay for 960

V

Very low density lipoprotein
Changes, after a fatty meal in normo- and hypertriglyceridemic man 217
Fate of phospholipids, cholesterol, and apoC during lipolysis in vitro 614
Human serum, secondary structure of 481

Rat intestinal lymph, turnover during triglyceride absorption 494
Rat, translation of proteins resembling apoproteins of 334
Secretion, effect of norepinephrine 2
Triglyceride, intestinal and hepatic secretion, by hypertriglyceridemic rats 371
Villus cells: Rat ileum, distribution of HMG-CoA reductase in 879
Vitamin A
Deficiency in rats, study of retinyl palmitate hydrolase activity in livers 760
Partial amino acid sequence of human plasma retinol binding protein 865
Vitamin E: *see* **Tocopherol**
VLDL: *see* **Very low density lipoprotein**

W

Wax esters: Synthesis in mouse preputial gland tumors 890
White cells: Human, α-tocopherol content of 639
Wine: Content of mevalonate in 716

X

X-ray crystallography: Absolute configuration at C-25 in 3α,7α,12α-trihydroxy-5β-cholestan-26-oic acid by 935
X-ray diffraction patterns
Of anhydrous cholesterol and cholesterol monohydrate 525
Of mixtures of cholesteryl myristate and dimyristoyl lecithin 183

Z

Zucker rat (*fa/fa*): Onset of obesity in first week of life, in absence of hyperphagia 857

NEW METHODS INDEX

Volume 20, Numbers 1–8

Compiled by H. A. I. Newman

The numbers in this index refer to entry numbers in the New Methods listings, which are found on the pages of Volume 20 given below.

Nos. 1– 43, pp. 140–141
Nos. 44–102, pp. 285–287
Nos. 103–155, pp. 417–419
Nos. 156–192, pp. 564–565
Nos. 193–267, pp. 686–689
Nos. 268–310, pp. 801–803
Nos. 311–344, pp. 919–920
Nos. 345–382, pp. 1050–1051

ENTRY NO.

Acetate: GLC of, in body fluids 224
Acetate kinase: Affinity chromatography purification 207
Acid β-D-galactosidases: Characterization 50
Aflatoxins
  B_1, differential pulse polarography of 312
  direct acetylation on TLC before chromatography 156
  laser fluorometric determination of 345
  HPLC 157
  HPLC analysis 311
  M_1: TLC 44, 158, 346
5α-Androstane-3α,17β-diol: Radioimmunoassay in the presence of 5α-androstane-3β,17β-diol and 5α-androstane-3α,17β-diol 45
Antioxidants: Determination of BHA, BHT and TBHQ in fats and oils 268
Apolipoprotein B: Enzyme immunoassay 138
Apolipoproteins
  A-I and A-II, two methods for metabolism study 180
  ApoC-II and ApoC-III of human very low density lipoproteins, quantification by analytical isoelectric focusing 176
  B, characterization of polypeptide of human VLDL in detergent and denaturant solutions 240
  direct measurement of specific activity in ^{125}I-labeled lipoproteins 179
  immunonephelometric quantification simplified in hyperlipoproteinemic serum 363
  molecular weight and hydrodynamic properties of, in guanidine hydrochloride and sodium dodecyl sulfate solutions 241
  nephelometric determination 297
  technique for solubilizing 313
  E, Type III diagnosis without ultracentrifugation 159
  Solubilization and quantification, a comparison between isopropanol and tetramethylurea as delipidizing agents 178
Apoproteins: A-1, surface property simulation with a synthetic amphiphilic helical docosapeptide 362

ENTRY NO.

***S*-Behenyl coenzyme A:** Synthesis of 61
Bile acid analogues: Selenium-75 or Tellurium-123M labeled 193
Bile acids
  Chenodeoxycholate conjugates, homogeneous enzyme immunoassay 314
  Chromatography with silicic acid 103
  Conjugated, MS of 196
  Conjugated, TLC of 269
  Fecal, GLC and radiocarbon determinations compared 48
  HPLC 105, 271
  HPLC of fecal 104
  HPLC-MS of 197
  3α-Hydroxy, determination of 270
  Mass fragmentography determination in normo- and hyperlipoproteinemia 160
  Separation from cholesterol by improved silylation and selective ion monitoring 194
  Serum total, enzymatic fluorometry for determining 315
  Simultaneous specific activity measurements in a mixture of radiolabeled 348
  Sulfates, synthesis of 198
Bile acid sulfates: Synthesis of 162
Bile alcohols: GLC-mass spectrometry of trimethyl ethers 161
Biotin: Determination 265
Gamma-Butyrobetaine hydroxylase: Measurement of 165
Carbohydrates: Periodate oxidation analysis by HPLC of conjugated aldehydes (peroxidation products) 126
Carnitine palmitoyltransferase: Assay conditions for human blood platelet 208
Carotene
  Beta, gel permeation and reversed phase chromatography as applied to HPLC for determination of 344
  High-speed video-densitometric determination of, after TLC 354
Carotinoids: HPLC of 55
Ceramide-3: Factors affecting alpha-galactosidase, a hydrolysis of 353

ENTRY NO.

CHD Risk: Multivariate procedures for the analysis of chronic disease development 278
Chlorophylls: High-speed video-densitometric determination of, after TLC 354
Cholecalciferol: 25-Hydroxy, HPLC 115
Citrinin: TLC of 346
Cholesterol
Adrenal scintiscanning with radioiodinated 338
Enzymatic assay rate studies of two reagent kits 154
Free and total, by a micro procedure 190
Free and total in tissue by enzymatic assay 137
High and low density lipoprotein, with heparin, iodinized calcium and anion exchange 79
High density lipoprotein, comparison between laboratories 96
comparison of methods 300
High-density lipoprotein, by precipitation with sodium phosphotungstate–magnesium 296
High-density lipoprotein, determined enzymatically and by ultracentrifugation 295
HPLC of free and esterified 273
Increased extraction from red cells with modified plasma lipoprotein 199
Radiohalogeno derivatives, affinity to lipoproteins and adrenals 259
Separation from bile acids by improved silylation and selection monitoring 194
Specific assay yields reduced cholesterol/phospholipid molar ratios in cell membranes 350
Spectrodensitometry of nanogram quantities 95
Total determined amperometrically 200
Cholesterol epoxide hydrase: Radiochromatographic assay 274
Cholesterol esterases: Immunological comparisons 167
Cholesterol metabolism: 7-Dehydrocholesterol reductase inhibition studies with AY9944 163
Cholesteryl acetate: Reaction with *tert*-butyl hydroperoxide in the presence of tris(acetylacetonato) iron (III) 261
Cholesteryl esters: Synthesis with labeled fatty acids 323
Choline: Determination in rat liver 304
Chromatography
Column, applicator for 106
Reaction liquid 351
Cortisol: Radioimmunoassay of serum 379
Cyanolipids: NMR of seed oil for 174
Detergents
Interaction of dodecyl and tetradecyl sulfate with proteins during PAGE 201
n-Octyl-beta-D-glucoside, synthesis of a nonionic surfactant for membrane studies 316
Nonionic, removed to allow reconstitution of dopamine-sensitive adenylate cyclase 202
Diacetoxyscirpenol: TLC of 346
Dicarboxylic acids: C_6–C_{10}, determined in serum by selected ion monitoring 272
3-alpha, 7-alpha-Dihydroxy-5-beta-cholestanoic acid: Synthesis by reverse cross-coupling 349
Erythrocytes: Velocity sedimentation in isotonic saline and sucrose 242

ENTRY NO.

Fabry disease: Lysosomal enzyme assay for diagnosis of 164
Fat tolerance: Simple method for 355
Fatty acid methyl esters: Florisil column separation of normal and hydroxy 318
Fatty acid synthetase: Mass fragmentography assay 204
Fatty acids
Cyclopentenyl, GLC–MS of 228
Diunsaturated, methylene- and ethylene-interrupted hydrogenated on palladium-on-Resin II 285
Esters, synthesis of polyol glucosides of 57
GLC of, from human lipids 282
GLC of cerebrospinal total 284
GLC with glass capillary column on *Bacillus cereus* 122
GLC–MS of, in petroleum 229
HPLC of long and short chain phenacyl and naphthacyl esters 120
Hydroxy, isolation of 63
ω-Hydroxy by DEAE–Sephadex ion exchange, ester artifacts 280
I-123, in myocardial metabolism studies and clinical diagnosis 225
Long-chain 283
Long-chain, alpha-chlorination 283
phthalate interference of GLC 281
Long-chain ^{18}F-labeled, for myocardial metabolism study 223
Methoxy phenacyl ester quantitation 121
Monounsaturated, hydrogenation on palladium-on-Resin II 285
Polyunsaturated, Double bond positions determination in conjugated 221
HPLC of 12-oxododeca-4, 8-dienoic 56
12-Hydroxyl eicosatetraenoic, preparation of 59
Synthesis of dienoic 58
Saturated, spin labels with terminally located nitroxide groups 222
Separated and quantified by reversed-phase HPLC 309
Short chain, GLC 129
Short chain, GLC determination in plasma and brain 218
Synthesis of 16-methyl-telluro-Te-123M-9-hexadecenoic, potential myocardial agent 219
Unsaturated, spin labels with terminally located nitroxide groups 222
Unsaturated, HPLC of, and their hydroperoxy and hydroxy derivatives 119
Volatile, determination in biological fluids 62
Fatty acyl-CoA esters: Determination of thioester purity 171
Free fatty acids
GLC on polyethylene glycol stationary phases 357
pH-Stat titration for monitoring release from adipocytes 356
Stability with different storage conditions 123
Fenthion: Determination in fat 53
Fucosidase: Purification and serologic studies 111
Galactosaminitol: Amino acid analyzer analysis 124
Galactosamine: Amino acid analyzer analysis 124
α-Galactosidase: Trihexosylceramide 52

ENTRY NO.

Galactosyltransferase: Separation of two activities 49
Gangliosides
Characterization from bovine erythrocyte membranes 125
Rapid isolation method 286
GM_1-Gangliosidosis: Lysosomal enzyme assays for diagnosis of 164
Glucocerebrosidase: Tissue culture assays of, with natural substrates 107
Glucosaminitol: Amino acid analyzer analysis 124
Glycerides
ORD and CK of unsaturated 172
Synthesis of C-14 labeled 322
Glycolipids
Attachment to solid supports and macromolecules 231
In Krabbe's Disease 65
Isolation by DEAE-silica gel and DEAE-controlled porous glass 289
Le^a blood-group active, isolation and purification 67
Neutral, perbenzolated, separated by HPLC and detected at 230 NM 69
Release of oligosaccharides from, by endo-galactosidase 66
Sialic acid determined colorimetrically with methyl-3-benzothiazolinone-2-hydrazone 290
Synthesis of a new class of model 230
Synthesis of UDP-*N*-[1-^{14}C]acetyl-D-galactosamine and D-glucosamine from radioacetate 291
Gorgosterol
Demethyl, Synthesis of 262
Synthesis stereoselectively 260
Hexosamines: Rapid chromatographic analysis 173
High pressure liquid chromatography
Gradient elution as applied to reversed-phase systems 358, 359
Micro-precolumn method for pre-treatment of samples 130
TLC, HPTLC and PMD correlation to 131
Hydrocarbons
Acetamidation of 70
GLC of 71
GLC(capillary column) for analysis from rock and crude oil samples 234
High boiling determined by gas–solid chromatography–MS 233
Polycyclic, by HPLC 292, 293
Polycyclic hydrocarbons, detection by vacuum distillation from TLC and subsequent Shpol'skii low-temperature fluorescence 320
Polynuclear, liquid chromatographic analysis detector for 132
Hydroxybutyrate: Blood, continuous monitoring 60
Hyperlipoproteinemias
PAGE for lipoproteins in 237
Type III, diagnosis of with apoprotein E without ultracentrifugation 159
specific diagnosis by gel isoelectric focusing 301
studied with agarose column chromatography 142
Isocholesterol: Isolation from lanosterol 339
Lanosterol: Isolation from "isocholesterol" 339
Lecithin/sphingomyelin ratio
Acid fuchsin–uranyl nitrate reagent for determination on TLC 305
Compared to bubble clicking in pharangeal aspirate 250
Linoleic acid hydroperoxide: Reaction with thiobarbituric acid 175
Lipase: Purification via bile salt affinity 168
Lipids
Chromarod analysis 76
From oats 227
Micromethods 321
Mild extraction from *Rhodospirillum–Rubrum* chromatophores 133
Peroxides, spin-trapping of hydroxyl radical 73
Plasma, TLC coupled with flame ionization 236
Plasma, TLC coupled with flame ionization for quantitation 235
Polar, two-dimensional TLC 135
Quantitative simplified extraction of brain 361
Refractometric assay of blood 324
TLC of, multiple 2-dimensional of brain 74
Volumetric method for trace organic chlorine in 360
Lipid oxidation 134
Lipid oxidation products: Separated by gel permeation and liquid column chromatography 294
Lipoprotein lipase
Activity assessed by semi-automated assay 317
Radioimmunoassay of 275
Specific method for in postheparin plasma with sodium dodecyl sulfate for inactivation of hepatic triglyceride lipase 352
Lipoprotein-X
Colorimetry for quantitative determination without electrophoresis 82
Diagnostic value of 83
Lipoprotein and hepatic effect on electrophoretic mobility 81
Lipoproteins
Agarose electrophoresis 77
Binding to radiohalogenated cholesterol derivatives 259
High-density, a new subclass (HDL_2C) in newborn blood plasma 325
cholesterol assay, Mg^{2+} accurate solution preparation 298
cholesterol determined by enzymatic ultracentrifugation technique 295
cholesterol determined with sodium phosphotungstate–magnesium 296
Comparison of methods 300
Heterogeneous by three isolation procedures 364
High density, as a marker for alcoholism 232
High density determination of cholesterol 239
Human endothelial cell interactions 80
Low density, human serum, radioimmunological study of the surface 238
PAGE for 237
Quantitative analysis by TLC 326
Radioimmunoassays for 139
Separation for lipid determination without ultracentrifugation 299
Simplified protein determination by Lowry 141
Ultracentrifugation by comparative methods, nonhuman primate serum 177

ENTRY NO.

Very low-density, two fractions separated with starch block electrophoresis 327
Very low-density, selective precipitation of 140
VLD and LD, preparative isoelectric focusing 181
Liposomes
Aggregation of, by higher molecular weight dextrans 245
K cell interaction with 88
New method for preparation 243
Lipoxygenase: Separation by hydrophobic chromatography 166
Lithocholic acid: conjugates, radioimmunoassay of 47
Lypolysis: Automated assay of, during fat cell perfusion 109
Lysosomal enzymes: For the detection of lysosomal disorders in Tay-Sachs, GM_1-gangliosidosis and Fabray diseases 164
Mannosidase: Isolation by benzidine–sepharose chromatography 112
Membranes
Bimolecular lipid, electrochemical reactions in the iodine–iodine system 303
Electron density profiles method 183
Fluorescent probes with model 184
Glycoproteins, solubilization with Triton X-100 of human erythrocytes 331
Immunofluorescence staining of cell surface 84
Isolation of dog kidney cortex luminal and antiluminal 329
Kidney brush border, rapidly isolated 366
Microviscosity with pyrene excimers 302
Monazomycin probe for 72
Organization and dynamics of lipids 247
Plasma, chemical cross-linking for studies with 328
isolation and characterization 86
isolation of toad bladder radioiodinated apical and basal-lateral 333
photosensitive hydrophobic probes to label the human erythrocytes 334
preparation of from guinea pig hepatomas 85
preparative scale isolation of rat intestinal epithelial cell basal-lateral 330
radioiodination of toad bladder 332
Plasma, isolation and partial characterization of from rat lung alveoli 246
Probe 2,4,6-trinitrobenzene sulphonate of cell membrane surface 244
Probes for ^{13}C chemical shifts of *n*-hydroxy- and *n*-(9-anthroyloxy)-stearic fatty acids 367
Raman special analysis of the 1300 cm^{-1} region for 365
Raman spectroscopic probes for structure of, deuterated phospholipids as probes 87
Membrane vesicles: Preparation of myelin 143
Methyl oleate hydroperoxides: Identification through thermal decomposition–GLC–MS 170
Monoacyl glycerols: High pressure liquid chromatography 75
Monosaccharides: Electrophoresis for microdetermination 128
Mycotoxins: Extraction and fractionation from grain of 14 347

ENTRY NO.

Neuraminic acid: *N*-Acetyl by selected ion monitoring 127
Nucleosomes: Purification of monomeric 248
Ochratoxins: TLC of 346
Oils
Analysis of 217
Edible, separation methods in processing 216
Fractionation of 64
Rancid groundnut TLC interference with castor oil detection 136
Olefins: Selective bromination 220
Oligosaccharides: Release of, from glycosphingolipids by endogalactosidase 66
Oses: Neutral, chromatography of 173
Palmitoyl-CoA synthetase: Assay conditions for human blood platelets 208
Patulin: TLC of 346
Penicillic acid: TLC of 346
Penitrem A: TLC of 346
Phosphate: Assay, characterization 186
Phosphatidyl choline
Disaturated, fluorescence diminution quantitation of amniotic 370
Enzymatic assay with micromolar quantities 368
Immobilized phospholipase D and choline oxidase for amperometric determination 335
Synthesis of cyclic enediol phosphate analogs 145
Phosphatidyl glycerol
Fluorescence diminution quantitation of amniotic 370
TLC in 261 amniotic fluid samples from normal and diabetic pregnancies 373
Phospholipase: Assays with immobilized phospholipids 110
Phospholipase A: Bioluminescence assay 277
Phospholipase C: Bioluminescence assay 377
Phospholipids
Acid fuchsin–uranyl nitrate detection reagent on TLC 305
Analysis by densitometric TLC 249
Detection on TLC with modified Dittmer–Lester reagent 372
Deuterated as Raman spectroscopic probes of membrane structure 87
Extraction from bovine spinal chord 94
Phosphorus, determination with magnesium nitrate digestion 369
Selective extraction from egg yolk 371
Spectrophotometric determination 144
Spin labeling of polar heads with 2,2,5,5-tetramethylpyrroline-*N*-oxide-3-carbonyl chloride 90
Synthesis with oxazaphospholanes and dioxaphospholanes 89
Phosphoryl choline: Determination in rat liver 304
Polyphosphoinositides: Purification on immobilized neomycin 185
Propionyl-CoA carboxylase: Activity after electrophoresis 108
Prostaglandins
A, detection in human semen 257
A_1, new derivatives of 257
AZA, synthesis of 253

ENTRY NO.

D_2, immunoassay with immobilized ligands and [^{125}I]protein A 337
11-Deoxy PGE_2, synthesis of sultam analog 254
5,6-Dihydro, immunoassay with immobilized ligands and [^{125}I]protein A 337
13,14-Dihydro E_2, immunoassay with immobilized ligands and [^{125}I]protein A 337
13,14-Dihydro-15-keto-prostaglandin $F_{2\alpha}$, radioimmunoassay of 153
E_1, 11-desoxy-dihydro-prostaglandin, transhydrin nuclear analog synthesized 187
E_1 and E_2 simultaneously measured by mass spectrometry with a deuterated internal standard 374
E_1 and F_1, assayed by multiple ion analysis 188
11-Epi-$PGF_{2\alpha}$, synthesis with *t*-butyldimethylsilyl ether 375
Extraction and specific detection by selective ion monitoring 152
$F_{1\alpha}$, characterization by GLC–MS 189
$F_{2\alpha}$, radioimmunoassay of metabolite in patients with respiratory diseases 307
12-Fluoro, synthesis of 256
HPLC and radioimmunoassay of cyclooxygenase products and metabolites of 336
15-Hydroxy-11 Alpha, 9 Alpha(epoxymethano)-prosta-5,13-dienoic acid, immunoassay with immobilized ligands and [^{125}I]protein A 337
19-Hydroxylated, detection of 257
8-Iso, evidence for eight compounds in human semen 258
12, 6-Keto-F_1-Alpha, immunoassay with immobilized ligands and [^{125}I]protein A 337
Lipophilic anion exchange analysis of urinary 147
Purification 276
Radioimmunoassay effects by free fatty acids 306
Radioimmunoassay comparisons 151
Radioimmunoassay of, improved by methyl esterification 150
Separation of A, E, and F, with acid-washed florisil columns 252
Spectrophotometric assay 205
Synthesis from arachadonic acid 251
Synthesis of β-lactam 148
Synthesis of tritium labeled 149

Prostaglandin endoperoxide D-isomerase: Purification 276
Prostanoid endoperoxide models: Synthesis of 146
Protein determination: With fluorescamine or *o*-phthalaldehyde 182
Proteolytic enzymes 78
Retinoic Acid
HPLC in biologic fluids 116
Isolation and identification of 4-hydroxy and 4-oxo 342
Retinoids: HPLC determination of aromatic and main metabolite of 343
Retinol: HPLC in presence of alpha tocopherol in human serum 308
Retinyl palmitate: Gel permeation and reverse phase chromatography applied to HPLC for determination of 344

ENTRY NO.

Sialic Acids
Colorimetric assay with methyl-3-benzothiazolinone-2-hydrazone 290
Histochemical demonstration in pancreatic islets 68
Sphingolipid hydrolases: Determination with natural substrates 206
Sphingomyelinase
Human peripheral blood leukocyte [^{3}H]sphingomyelin as substrate 113
Microassay in leukocytes and urine 169
Spectrophotometric determination 51
Tissue culture assays of, with natural substrates 107
Sterigmatocystin: TLC of 346
Steroids: Combined celite column chromatography–HPLC, for separating 14 testicular 376
Sterols: Fluorination of 378
Sulphatidase: Rapid assay with [^{3}H]cerebroside sulfate as substrate 203
Surfactants: Atomic absorption spectroscopy of 191
Tay-Sachs disease: Lysosomal enzyme assays for detection 164
Thin-layer chromatography: Twenty years of experience 380
Thromboxanes
B_2, GLC–MS 189
B_2, immunoassays with immobilized ligands and [^{125}I]protein A 337
5-Oxo-13,14-dihydro, B_2, structural verification 255
Tocopherol
Alpha, HPLC in presence human serum retinol 308
Alpha, model compound, epoxidation of 212
Alpha, side-chain synthesis from (−)-(*S*)-3-methyl-gamma-butyrolactone 214
Alpha, total synthesis of 210
Differential pulse polarography 114
HPLC 310
TLC–GLC of 279
Tocotrienol: HPLC 310
T-2 Toxin: TLC of 346
Triglycerides
Biamperometric determination with open tubular carbon electrodes in flow streams 319
Comparison of manual and continuous flow colorimetry by a fully enzymatic method 287
Determinations, anesthesia interference 155
GLC evaluation of plasma composition 288
Separation by chain length and degree of unsaturation by silica HPLC 263
UDP-*N*-[1-^{14}C]acetyl D-galactosamine: Synthesized from radioacetate 291
Unsaponifiable matter: Quantitative procedure for measuring 377
Ursodeoxycholic acid: Enzyme-linked immunoassay of serum 195
Vitamin A
Acetate, HPLC determination simultaneously with vitamin D_2 and vitamin E acetate 340
Palmitate determination 264
TLC and densitometry of 267
Vitamin D
24, 24-Difluoro-25-hydroxy, synthesis of 382
High pressure liquid chromatography 192

ENTRY NO.

25-Hydroxy, simple micromethod for 381
25-Hydroxy, comparison of two methods in normal and osteomalacic subject serum 213
25-Hydroxy, in human serum 211
Metabolites, determination of 209
Vitamin D_2
Elution profile of metabolites from Sephadex LH20 columns 266
HPLC determination simultaneously with vitamin A acetate, and vitamin E acetate 340
Vitamin D_3
Chromatographic separation from vitamin D_3 sulfate 117
11,25-hydroxy, a hydroxylapatite assay for vitamin–receptor complexes 215
HPLC determination in fish products with vitamin D_2 as an international standard 341
25-Hydroxy[23,24-^{3}H], synthesis of 118
Specific assay 54
Synthesis from bile acids 226
TLC–densitometry of 267
Vitamin D_3 sulfate: Chromatic separation from vitamin D_3 117
Vitamin E: Acetate, HPLC determination simultaneously with vitamin A acetate and vitamin D_2 340
Zearalenone: TLC of 346

1980 SUBSCRIPTION RATES

In 1978 the JOURNAL OF LIPID RESEARCH increased the number of issues published annually from six to eight. This rate of publication has continued in 1979 and will be maintained in succeeding years. However, in order to provide for inflationary rises in editorial and production costs, the institutional subscription rate for Volume 21 (1980) will be increased from $70 to $80 per year. For individual subscribers who pay for the Journal by personal check the rate will remain at $30 per year.

Beginning in 1980, the Journal is also instituting a new student rate of $15.00 per year. This will apply to undergraduates and to students in graduate programs, medical schools, etc. To be eligible for the reduced student fee, a certification form must be completed and returned to the Business Office with the remittance. The form may be obtained from the Business Office, Journal of Lipid Research, 9650 Rockville Pike, Bethesda, Maryland 20014.

CONFERENCE ON THE BIOCHEMISTRY OF LIPIDS

The 22nd International Conference on the Biochemistry of Lipids will take place in Milan, Italy, on May 26–28, 1980. Meeting cochairmen are Dr. Rodolfo Paoletti and Dr. Giovanni Galli, Institute of Pharmacology and Pharmacognosy, Milan, Italy. The following topics will be discussed: fatty acid metabolism and nutrition, cholesterol and bile acid metabolism, and hepatic and extrahepatic lipoprotein lipases. For further information please apply to Centro Studi dell'Alimentazione, Nutrition Foundation of Italy, Via S. Pietro all'Orto 17, 20121 Milan, Italy; telephone (02) 709.514.
